

IZUU EKEH

Full-Stack Software Engineer

📍 Lagos, Nigeria | 📞 +2348106807535 | ✉ ekehizuu6@gmail.com

🌐 radiant-waves.com.ng | 🌐 linkedin.com/in/izuu-ekeh | 🌐 github.com/Ekehlzuu

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable web and mobile applications. Proficient in React.js, Node.js, Flutter, Python, Laravel, and TypeScript. Proven ability to deliver real-world products — including Radiant Waves, a live news aggregator platform — and award-winning hackathon solutions. Currently open to remote roles and freelance contracts globally.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Bootstrap

Backend: Node.js, PHP, Laravel, Python

Mobile: Flutter (cross-platform iOS & Android)

Design: Figma, UI/UX Prototyping

Database: MySQL, MongoDB, Firebase

Tools: Git, GitHub, GitHub Actions, REST APIs, CI/CD, VS Code

Networking: LAN/WAN, Routers, Firewalls, Network Troubleshooting

PROFESSIONAL EXPERIENCE

Self-Employed

Freelance Full-Stack Developer

Jan 2024 – Present

📍 Remote

- Build and deploy full-stack web applications using React.js, Next.js, Node.js and Laravel
- Develop cross-platform mobile applications using Flutter
- Design UI/UX prototypes and responsive interfaces using Figma and Tailwind CSS
- Integrate REST APIs, third-party services and payment gateways
- Manage deployment pipelines and CI/CD workflows via GitHub Actions
- Deliver clean, documented, maintainable code across all projects

Mainland Oil & Gas Ltd

IT/Technical Support & Networking Specialist

2024 – Present

📍 Lekki, Lagos

- Provide technical support for daily business operations, ensuring minimal downtime
- Manage and maintain company network infrastructure for optimal performance
- Configure and troubleshoot routers, firewalls, and network devices
- Monitor system performance and proactively resolve issues

MRsoft Technologies

Software Specialist (Junior Associate)

2023 – 2024

- Developed and tested software modules for client-facing applications
- Collaborated with senior developers on real-world full-stack projects
- Diagnosed and resolved software performance and integration issues
- Assisted in IT support and user training environments

Self-Employed / Personal Projects

Junior Software Developer

Jan 2022 – Dec 2023

☐ Remote

- Built web applications and personal projects using React, Node.js and PHP/Laravel
- Developed mobile apps with Flutter for Android and iOS
- Sharpened skills across the full stack through hands-on project development

PROJECTS
